

Heard of Six-Sigma?

Not sure how it would benefit a small to medium sized manufacturer?

Bristol Area
(M4 / M5 interchange)

Tuesday 15th January 2008

09:00 – 16:00

Leaders and Senior Managers

Understanding Six-Sigma

An Awareness Day for Leaders and Senior Managers

What is Six Sigma?

The practice of Six-Sigma enables the measurement and removal of variation and waste from within functions and processes. This powerful process methodology operates within the structure of DMAIC:

- Define
- Measure
- Analyse
- Improve
- Control

We invite you to an event designed to show leaders within a small to medium sized manufacturing business how Six-Sigma can be used as an essential tool in the journey towards lean sustainable continuous improvement, whilst increasing competitiveness, improving performance and motivating employees, using team based tools and techniques.

The methodology is project focused and delivers bottom line results fast.

What will the event cover?

- **Understanding the Six-Sigma problem solving principles as used by Green & Black belts**
- **Interactive learning session**
- **Statistical tools in action**
- **Statistical Process Control (SPC)**
- **Measurement Systems Analysis**
- **Design Experiments**
- **Interactive Learning Sessions**

South West Manufacturing Advisory Service

The trusted provider of advice and hands-on support for manufacturers aiming to achieve sustainable success

Important: This event does not require any prior knowledge of Six-Sigma

Don't take our word for it:

*"I was amazed at the results from this Programme when my operations team carried out the course project. It reduced our setups on a running product which has led to savings of over 100 man hours in the year, meaning we can manufacture smaller batches and deliver quicker!!
...I want to know how they did it and be able to support more similar projects."*

– Karen Friendship, Managing Director, Aldermans

BERR manufacturing advisory service

South West Manufacturing Advisory Service (MAS) is run by manufacturers for manufacturers and is dedicated to providing companies in the South West with the best available information and advice. Offering Free or subsidised hands-on support from manufacturing specialists, South West MAS is focused on securing the future of manufacturing in the region by helping manufacturing businesses improve productivity, reduce waste and compete more effectively in the marketplace. www.swmas.co.uk

Understanding Six-Sigma Tools for lean sustainable continuous improvement

What will you learn?

In addition to a better understanding of Six-Sigma tools and techniques that can be applied within your business to enable sustainable process improvements, you will learn how to:

- Identify how to use the tools and techniques within your business
- Identify who would “champion” Six-Sigma within your company

How do I start a Six-Sigma Project within my company?

Following on from the One Day Event, South West MAS will be running a Green Belt Lean Six-Sigma Programme in the Bristol / Glos area, starting 19th February 2008, aimed at small to medium sized manufacturing businesses. The Programme will run over 12 days, spread over 6 months, which focuses on an in-company improvement project with tangible benefits and measurable improvements.

PASS IT ON

Not for you? Then invite others along instead or put it on your notice board.
