

# Nuclear Supply Chain Specialist

Full-Time | Excellent benefits package.

Based from Somerset Energy Innovation Centre - working on clients sites across South West and South Wales

SWMAS plays a key role in providing tailored advice and consultancy to businesses across the South West of England and South Wales. SWMAS Ltd delivers national and regional business support services to support economic growth, our aim is to help businesses of all sizes develop and prosper, with a specific focus on improving the competitiveness and growth potential of SME companies.

We now require a supply chain specialist to work with manufacturers and their suppliers to develop advanced manufacturing supply chains through the delivery of specialist support programmes. These programmes include diagnostic reviews, consultancy advice and the development and implementation of improvement plans, backed by funding, training, and networking events.

As a supply chain specialist, you will work closely with leading OEM's, Primes, First Tier organisations within the Nuclear market and their suppliers in order to develop relationships, improve effectiveness and build sustainable growth for all parties based on a collaborative approach.

## Your role will involve

- Working with leaders in OEM's, Primes and First Tier organisations to obtain an in depth understanding and insight into the customer specific needs, requirements, and current plans for development of their supply chain
- Developing suppliers' awareness and understanding of the business opportunities available to them through clarity on routes to market for the customer specific needs
- Managing client relationships through the development and delivery of support services to suppliers, such as improvement projects, consultancy advice and training.
- Build their capability to engage and operate within supply chains and ensure sustained improvement for both customer and supplier
- Sharing best practice with other relevant stakeholders and contributing to a national programme for supply chain development within manufacturing.

## To be successful in this role you will

- Have extensive experience and understanding of supply chain strategy development and management within the energy sectors at OEM, Prime, First Tier or sector group level
- Have demonstrable Nuclear sector experience
- Be highly commercial with a comprehensive understanding of business finance, operations and marketing, able to operate at strategic level with client businesses
- Be able to build effective relationships with clients engaged in supply through an in-depth understanding of the challenges encountered when working within supply chains
- Confident presenter and experienced in leading supplier development programmes
- Possess a successful track record of delivering business advice and developing solutions through effective client management
- Possess strong analytical and organisational skills combined with attention to detail. Pragmatic, numerate with excellent presentation and communication skills
- Be qualified to degree/HNC/HND level within a relevant technical or engineering discipline.

If this is you, please email your CV and covering letter to Nick Golding – [nick.golding@swmas.co.uk](mailto:nick.golding@swmas.co.uk)
